4 COMMENTS

- The block comment on top of each method clarifies what the method does. Some of them even provide quick pseudocode for further knowledge

- Some comments are nice jokes

- In Deque.java, the one-line comments clarify what if statement is needed in each method

3 STYLE

- The indentation and whitespace in the if-else statements can need some work. The else statements are on the same line as the closing bracket of the if lines

4 ROBUSTNESS

- Various if statements are used to ensure no errors occur in each method

- The implementation of each method is short and concise
- The driver class offers a wide range of test cases

3.5 README

- The use of checkboxes adds a nice aesthetic touch and clarifies what has been completed and what hasn't
- The link at the bottom has a nice picture

- The In-Depth Progress lays out every single step and methods nicely
- The README says the team used doubly-linked lists but the team actually used DLL Nodes
